EXPERIENCE

Superside, Remote — *Software Engineer (frontend)*

November 2021 - June 2025

- Responsible for maintaining and creating features for the marketing website of Superside.
- Led the successful migration of our codebase from Next.js to Astro to utilize the server first approach.
- Went through two rebrands of the company website, and created a lot of new components that adhere to latest trends (you can view some of them on <https://www.superside.com>)

Deloitte, Greece (hybrid) — *Software Engineer*

June 2021 - November 2021

- Learned the Adobe Experience Manager CMS really fast, and was able to work with few big clients (Illy coffee, etc)

Tekmon, Greece — *QA Engineer (internship)*

March 2021 - May 2021

- Designed and executed UI/UX test scenarios for web and mobile applications.
- Identified layout inconsistencies and accessibility issues across devices (browser, tablet, mobile).
- Was part of the development of an automated application to test the company's application using Selenium

EDUCATION

Computer Science & Engineering

University of Ioannina, Greece

September 2014 - July 2021

Integrated MSc Degree in Computer Science & Engineering.
My thesis was on testing and verifying a greedy algorithm for Dynamic Graph Orientation

TECH STACK

- **Frameworks:** React, Next.js, Astro
- **Languages:** TypeScript, JavaScript (ES6+), HTML5, CSS3
- **Styling:** TailwindCSS, CSS Modules, PostCSS
- **Libraries:** Framer Motion, Shadcn/ui, Radix UI
- **State:** React Context, Zustand, Signals (Astro)
- **CMS & Data:** Sanity (v3), AEM, WordPress
- **Tooling:** Vite, Webpack, ESLint, Turborepo
- **Testing:** Playwright, Storybook, Chromatic
- **AI Tools:** ChatGPT, v0.dev
- **Design:** Figma, Lottie (JSON animations)

SKILLS

- Component-driven UI architecture.
- Responsive design & modern CSS architecture.
- Performance optimization (Core Web Vitals, lazy loading)
- Accessible first components
